ROCKY LAKE PROJECT

The Rocky Lake Project is comprised of 5000ha of mineral exploration licenses in a prospective Ni, Cu, Zn, Au area. The Rocky Lake Project is located only 65km away from the nearest smelter at Flin Flon and only 11km SW of the Namew Lake Ni-Cu mine. Previous assays from a HudBay Minerals drill program failed to adequately test some of the strongest anomalies on the prospect. As such, QMC will aim to conduct additional surveys and identify targets for follow up drilling in 2011.

NAMEW LAKE PROJECT

The Namew Lake Project is a green field prospect consisting of 24,691 Ha of mineral exploration licenses in proximity to the Namew Lake mine in the world-class Flin Flon VMS district. There are a number of anomalies and magnetic conductors which represent an excellent possibility for mineralization. QMC intends to further explore this project using surface mapping and sampling to identify targets for drilling in 2011.

CARROT RIVER PROJECT

The Carrot River Project is located in Northeast Manitoba in an area associated with known gold-silver occurrences, and is considered a multi-metal property. In 1998 alone there were 4 new gold discoveries made in the surrounding area. Optioned to Cassius Ventures Ltd. Drilling February-March 2011.

WHY INVEST IN QMC?

High potential prospects in Flin Flon VMS district, Manitoba, the largest Paleoproterozoic VMS district in the world. Manitoba is one of the most mining friendly places in the world offering excellent tax incentives for exploration. QMC has a management team comprised of seasoned veterans from the realms of corporate finance and exploration geology. Many investment analysts are forecasting a strong rally in the resource sector with gold & copper already at record highs.
